Re: Schedule and Design Drawings
Interstate Pollution Control/Roto-Rooter Superfund Site
Winnebago County, Illinois
SECOR Project No.: 61UN.05046.00.0004

Dear Mr. Wilson:

SECOR International Incorporated (SECOR) hereby submits a revised schedule and revised design drawings for the above-referenced project on behalf of Interstate Pollution Control/Roto-Rooter Superfund Site Remedial Design/Remedial Action Steering Committee (Group).

Please note on the drawings that we have made the following revisions:

- The slopes at the north edge of the site have been flattened to provide a more stable area. This was done at the suggestion of the paving contractor.
- The 12" layer of CA-16 was replaced with 6" of CA-6 over 6" of CA-16 with the geotextile in between. The purpose of this change is to allow better compaction while meeting the requirements of the FML manufacturer.

If you have any questions, please call me.

Sincerely,
SECOR International Incorporated

Kenneth G. Smith, P.E.
Project Manager

NOTES

1. BASE FILL MATERIAL (BELOW GEOTEXTILE) SHALL BE CLEAN MATERIAL, FREE OF ROOTS, ROCKS OVER 3 INCHES IN DIAMETER AND DEBRIS.
2. BASE SHALL BE ROLLED WITH STEEL ROLLER.
3. PROPOSED MONITORING WELLS, TO BE INSTALLED BY OTHERS.
4. COVER FILL PLACED ABOVE FML SHALL BE 6" OF CA-6 UNDER 6" OF CA-6 OR AS APPROVED BY ENGINEER.
5. EXISTING CONCRETE PAD MAY REMAIN IN PLACE IF IT DOES NOT INTERFERE WITH GRADING. ANY PORTION OF THE PAD WHICH MUST BE REMOVED SHALL BE DISPOSED OF BY BURYING ON SITE.
6. BROKEN CONCRETE SHOWN ON FIGURE 1 SHALL BE SPREAD OUT IN A SINGLE LAYER IN FILL AREAS. SUFFICIENT SPACE BETWEEN PIECES OF CONCRETE SHALL BE MAINTAINED TO PREVENT VOIDS IN BACKFILL MATERIAL.
